Filo no. 58: Multifunctional wear for NextGen fashion

A new generation of consumers is asking for a new fashion, attentive to sustainability and capable of combining style with performance. In the “Dialoghi di Confronto” - which take place in the Networking Area of the 58th edition of Filo - two leading companies in the world of textiles interpret this need: Coatyarn e Südwolle Group.

The appointment is for 15 September at 2.45 pm with the talk “Multifunctional wear: design e performance per una moda NextGen”. Speaker are: Gianluigi Mazzoleni, CEO Coatyarn, and Alessandro Dalla Pozza, Product Management Team, Südwolle Group Italia.

The Multifunctional Wear project was born from the collaboration between Coatyarn, leader in the production of high-performance coated yarns, and Suedwolle Group, world leader manufacturer of worsted yarns for pure and mixed wool weaving, circular and flat bed knitting.

Coatyarn's Fashion Designer Emanuela Roncalli interpreted the need to join design and performance for multifunctional fashion by combining TPU Evolution®, Coatyarn's 100% made in Italy polyurethane yarn, and Caprera GRS, sustainable blend with merino wool and Coolmax Ecomade.

TPU Evolution® guarantees excellent resistance to abrasion, wear, hydrolysis, oils, greases and solvents, at the same time maintaining its peculiar soft touch; Caprera GRS enhances the thermoregulatory and breathability properties of 19,3 micron merino wool processed with Naturetexx Plasma, an eco-friendly and chemical-free treatment joined with Coolmax Ecomade polyester fibers 100% derived from recycled plastics.

The synergy between the two products gives life to garments that combine comfort and performance with style and aesthetics, thus adapting to the most diverse applications.

Coatyarn is present at the 58th edition of Filo at stand B11.

We look forward to welcoming you at Filo on the 14th and 15th of September 2022 at Allianz MiCo - Milan!
