

INTERNATIONAL EXHIBITION OF YARNS AND FIBRES
FOR WOVEN AND KNITTED FABRICS
FOR APPAREL, FURNISHING AND TECHNICAL TEXTILES

Filo62: C.L.A.S.S. presents start-ups “taking nature to the next level”

One of the primary objectives of “Sustainability from A to Z”, the joint Filo–C.L.A.S.S. initiative, is to provide correct information to companies on the topic of responsible innovation.

As part of the Dialoghi di Confronto of the 62nd edition of Filo, attention is focused on SQIM and Innuance – two start-ups that offer new innovative and creative solutions for the textile industry.

Moderated by Giusy Bettoni, Silvia Gava (Product Manager at Ephea™, a brand of the biotechnology company SQIM) and Francesco Bazzano (administrator and cofounder of Innuance) will discuss their qualities in the talk “Let’s take nature to the next level”.

The appointment is at Allianz MiCo-Milano, Filo Networking Area

Thursday 19 September 2024, at 10:30am

With ephea™, SQIM brings to market an entirely new class of flexible mycelium materials.

Innuance: highly innovative dyeing solutions and responsibility thanks to the use of food colorants combined with a patented know-how of their application to textile products, with high levels of quality and performance.

These are innovative new-generation solutions proposed by Italian start-ups, which will be able to conquer the Filo audience, always attentive not only to learning about new products, but often to being pioneers of innovation.

These products represent not only responsible innovation but also the shared commitment of Filo and C.L.A.S.S. towards sustainable textile production, in line with the expectations of contemporary consumers who seek beauty, performance and sustainable quality.

The 62nd edition of Filo will take place on 18 and 19 September 2024 at Allianz MiCo – Milan (via Gattamelata 5).
