Filo63: ERCA TCS Solutions for a “Green Chemistry”

In the pursuit of a textile and fashion system that is increasingly aware of the environmental and social responsibilities of businesses, as well as the need to offer final consumers a truly sustainable and traceable product, the proper management of chemical auxiliaries plays a crucial role. This awareness has led to what we can define as “green chemistry.”

At Filo, thanks to its long-standing collaboration with C.L.A.S.S., visitors will have the opportunity to meet one of the most cutting-edge companies in this field: ERCA Textile Chemical Solutions. An Italian company entirely focused on the production of responsible chemical auxiliaries for the textile sector. It is part of ERCA spa, a group committed to responsible innovation, with seven plants across Europe, Latin America, and Asia, dedicated to the development, production, and commercialization of specialty chemicals and chemical intermediates.

As part of the “Dialoghi di Confronto” at the 63rd edition of Filo, Roberto Ghioldi (Sales Director, ERCA TCS), interviewed by Giusy Bettoni (CEO and Founder of C.L.A.S.S.) will illustrate the company’s research journey, which has led to next-generation textile auxiliaries designed to become circular ingredients for today’s sustainable industry.

The talk is titled: “ERCA Textile Chemical Solutions and Industrial Upcycling: How REVECOL® is Changing Textile Chemistry with Performance, Certifications, and Competitiveness.”

The talk will take place at Allianz MiCo-Milan, Filo Networking Area

Wednesday 26th February 2025, at 3.30PM

The 63rd edition of Filo will take place on 26-27 February 2025 at Allianz MiCo – Viale Eginardo – Gate 3, Milan

Biella, February 2025
