

Filo Brings “Made in Filo” Capsule Collection to Milano Unica 2025

Published: July 9, 2025

Author: TEXTILE VALUE CHAIN

Filo is participating in *Milano Unica* from 8–10 July 2025 at *Fiera Milano Rho*, presenting its exclusive “Made in Filo” initiative. This prestigious trade fair is dedicated to premium apparel fabrics and accessories and serves as a key platform to highlight innovation and sustainability in textile production. Filo’s presence, located in Hall 4—also home to the *Innovation Area* and *MU Sustainability Trends*—underscores the importance of a well-connected and integrated supply chain to elevate quality and foster innovation in the textile and apparel sector. It reinforces the shared mission of both fairs in spotlighting sustainable practices and forward-thinking processes.

This year, Filo introduces “Made in Filo,” a groundbreaking initiative showcasing fabric samples created directly by Filo. The capsule collection is a result of collaboration across the entire textile value chain—including spinning, dyeing, finishing, embroidery, and weaving—represented by Filo’s exhibitors. It exemplifies the transformation of creative textile concepts into tangible, high-performance fabrics.

“Through ‘Made in Filo,’ we’ve taken a bold step—we’ve entered into production,” said *Paolo Monfermoso*, Manager of Filo. “As a trade exhibition, our role begins with yarn innovation and evolves into a complete fabric collection thanks to our partners’ exceptional processing capabilities. This journey—from yarn concept to final fabric—demonstrates the excellence and technical sophistication showcased at Filo. It’s a full-circle expression of creativity and innovation.”

The “Made in Filo” display serves as a preview for the **64th edition of Filo**, scheduled for 23–24 September 2025 at Fiera Milano Rho, Hall 14.

Don’t miss the opportunity to explore Filo’s creativity and craftsmanship at Hall 4 during Milano Unica from 8 to 10 July 2025.
